10. Column selection	N	Y
11. Inserting date and time	N	Y

What is the need of advanced editor?

- For supporting fast development by giving typing shortcuts, options to select, by giving pre-typed code.

What is an editplus?

- Like notepad, editplus is also an text editor
- It is used for developing
    1. a plain text file
    2. a html page
    3. any programming language programs

Advantages of editplus?

- we can achieve fast development
- with less typing

How to install editplus?

- open browser
- search 'Editplus download'
- click 'Editplus Download' link
- click 'Download; link
- Ediplus software exe file is download

- After downloading, click in exe file

- Once Installation is started, click on the
  the button showing on the series of windows

- After installation is completed,
  on desktop you can see a shortcut file
  'Ediplus' to start editplus

Running editplus?

- Double click 'Editplus' file available on desktop
- Click Trail, click 'I Agree'
- Editplus is not a free software, it works only 30 days
- After 30 days drag and hide the 'I Agree' window
- You can continue using editplus software

Stopping back up files creation in editplus?

- Click 'Tools' menu
- Click 'Preferences'
- Click 'Files'
- Uncheck 'Create back file'

Procedure to develop a program in editplus?

1. Open editplus
2. Hide the 'I Agree' window
3. Click File -> New -> Java
4. Java program template is opened
5. Type class name as "Example"
6. Save the file with the name Example
7. Type only Example, Editplus adds .java extension automatically
8. Java program is ready with the name Exampe.java

Configuring Compiler and JVM in editplus?

1. Click 'Tools'
2. Click 'Configure User Tools'
3. Click 'Add Tool -> Program' to configure Compiler
   Enter below details
   Menu Text : Compiler
   Command : Select C:\jdk-21\bin\javac.exe by clicking button

Argument : Choose option 'File Name' by clicking drop down button
Initial Dir : Choose 'File Dir' from drop down button
Click Apply, repeat the same procedure for configuring JVM

4. Click 'Add Tool -> Program'
Enter below details
Menu Text : JVM
Command : Select C:\jdk-21\bin\java.exe
Argument : Choose option 'File Name without extension'
Initial Dir : Choose 'File Dir' from drop down button
Click Apply, Click Close
5. Compiler and JVM software are configured in Editplus

Compiling and executing directly from editplus?

- Open Java file in Editplus
- Press 'Ctrl + 1' for compilation
- Press 'Ctrl + 2' for execution

CEs and REs displaying format?

- In Editplus also the CEs and REs are displayed same as earlier when we compile and run in command prompt

Rule in developing a class w.r.t editplus?

- The class name and java file name must be same
- else we will get runtime error: ClassNotFoundException
- There is no compile time error

Procedure for creating multiple java files?

- Click on File -> New -> Java -> save program
- Repeat the same procedure for creating multiple java file
